

Tyler Shelton CM 844

CSSE376

Lab 7

1. It allows you to automate testing of a web based project so that you don't have to sit and go through everything by manually clicking it.

2. It seems to be somewhat finicky which could make it difficult to use.

3. `<tr><td><a href="myCase.html">MyCase</a></td></tr>`

4. click `//a[@id='myLink']/`

5. Benefits- it gives a structured way to automate the tests

Drawbacks- it is not as easy to read as other tests
